HEALTH & SAFETY DATA SHEET

Product Name

WBS Long Life Masonry Coating

Composition

A controlled aqueous dispersion of the following materials:

- Resins
- Biocide
- Silica Sand
- Non toxic chemical additives

Hazardous Materials Classification

- There is no fire or explosion risks based on available information.
- It is recommended that personnel working with these products should wear the required protective clothing such as masks, goggles, etc. in accordance with Health and Safety regulations.
- Ensure high standards of personal hygiene.
- Do not smoke, drink or consume food in working areas.
- All work clothing should be changed regularly and laundered.

First Aid

- **Skin contamination** may cause some irritation – Wash with of clean water and soap (do not use solvents). If irritation persists, seek medical attention.
- **Eye contamination** will cause irritation – Irrigate immediately with copious amounts of clean running water for at least 10 minutes and if irritation continues seek medical attention.
- **Ingestion** – Rinse mouth, drink plenty of water and seek medical attention.
- **Inhalation** – Move to fresh air. If irritation continues seek medical attention.

Fire Fighting Measures

This product does not present a fire or explosion hazard. Use foam Co2, water or dry powder fire extinguishers.

Accidental Release Measures

Clean up procedures

- Spills should be collected in a suitable container and kept for safe disposal. Do not allow the contamination of watercourses.

Handling & Storage

- When handling this product due regard should be given to the risks outlined in 'Manual Handling Operations Regulations 1992'.
- Appropriate Personal Protective Equipment (PPE) should be worn whilst handling this product.
- The product should be stored in a cool dry area and away from direct sunlight or other extremes of temperature. Continued exposure to ground frost during storage will effect the performance of the product.

Exposure Controls/Personal Protection

Engineering Control Measures

- All areas should be well ventilated/extracted.

Respiratory Protection

- Suitable respiratory protection should be worn at all times, particularly if working areas are poorly ventilated.

Hand Protection

- PVC gloves should be worn when handling the product.

Skin Protection

- Suitable overalls should be worn and all garments are regularly laundered.

Eye Protection

- Use splash proof goggles when handling and using the product .

Physical & Chemical Appearance

- Appearance – Liquid looking coloured coating.
- Odour – Weak.
- Boiling Point – No data available.
- Flash Point – No data available.
- Solubility – Insoluble.

Stability & Reactivity

The product is stable under most normal storage conditions.

Disposal Considerations

Disposal of the product should be in accordance with any national or regional regulations that may be in effect. Dispose of polythene packing at authorised sites only away from access by children. Accumulation of waste insulation should be avoided to prevent wind dispersal. Treat as inert solid waste.

Transport Considerations

There is no special classification for conveyance required for this product. It should be duly noted however that packs of this product can be bulky when loading and unloading and the use of mechanical lift equipment should be considered.

Toxicological Information

From our experience and the information available to us, we are not aware that the product carries any harmful risk to health provided that all safety procedures as outlined in the 'Exposure Controls/Personal Protection' section are followed.

Ecological Information

Do not discharge this product into the natural environment or allow entrance to watercourses, etc.

Disposal Considerations

Disposal of the product should be in accordance with any national or regional regulations that may be in effect. Dispose of empty drums at authorised sites only.

Regulatory Information

Chemicals ('Hazard Information and Packaging for Supply') Regulations 2002.

Other Information

Other sources of information and current legislation relating to the product can be found in:

- Health & Safety at Work Act 1974.
- Control of Substances Hazardous to Health (COSHH) Regulations (4th Edition) 2002.
- HSE guidance note EH40 (Occupational Exposure Limits). EH40 is published annually and the most recent issue should be used.
- Manual Handling Operations Regulations 1992.
- St. John or Red Cross manuals on first aid measures.

NB. The data contained within this sheet refers to the water based version of this product. A solvent based version is available, to which the details contained within the WBS Wethertex data sheet apply (ref HS014). Particular regard should be paid to first aid measures.

Recipients of WBS products must take responsibility for existing laws and regulations and at all times operate within Health and Safety guidance on the use of these products.

The information provided within this data sheet is deemed to be accurate to the best of our knowledge and given in good faith.
